DE  
PATHOLOGIE  
EXOTIQUE

## INSTRUCTIONS TO AUTHORS

**B**ulletin of the Société de pathologie exotique is a French-speaking international magazine: articles can be sent to a language other than French as far as the authors are not French-speaking.

Every article sent for publication is registered and submitted to the weekly Editorial Board which examines and addresses it to two specialized external reviewers if considered in accordance with the editorial line of the issue.

A complete address must be provided (telephone and fax numbers, e-mail); the registration number of the article must be cited in all subsequent correspondence.

If the article has been co-authored, the written agreement of all authors must be enclosed in the first dispatch of the text. Confirmation that the article has not been submitted elsewhere for publication is also required.

Authors are asked to provide us, preferably by e-mail or any computer support, the text file (tables included) and the **original files** of figures and photographs.

**Documents of all kinds** (text, illustrations, computer graphics) **imply the publication and reprinting agreement by the Bulletin only**, except in the case of a special prior agreement between author and publisher.

### Articles

The number of pages for each article submitted to the review must not exceed 12 (including illustrations, bibliography, and summaries), i.e. 15 000 to 25 000 signs, except in exceptional circumstances with the agreement of the editorial board.

The summary, key-words, and the translation into English of the title, summary (which should be longer than the French one), key-words, titles of figures and tables must be attached. Titles and summaries in Spanish or Portuguese may also be accepted for publication.

A model of presentation for articles is available on our website ([www.pathexo.fr/bulletin/instraut.html](http://www.pathexo.fr/bulletin/instraut.html)).

### Short notes

Short notes should total 80 typed lines, not including the summary and key-words. A summary written in a different language than the one used in the article should be joined (in French if the article is in English), key-words (in English and French) four bibliographical references, possibly one or two tables or photographs. Short notes profit from an accelerated publication procedure.

### Solicited or editorial articles

Solicited or editorial articles are subject to a special agreement between the Editorial Board and the author(s).

### Open forum

Texts may be published under the sole responsibility of the author, possibly accompanied by an opinion from the Editorial Board or reviewers.

### Iconography

• **Tables:** they should not exceed a total of 4, and should be numbered in Roman numerals and be described by a title in both language (French and English) and possibly a legend.

• **Figures:** figures should be numbered in Arabic numerals, be of **excellent quality**, possibly on native file in order to ensure satisfactory reproduction and be described with a title (in French and English).

• **Photographs:** photographs must be preferably provided on computer support (on a separate file), or if not on hard copy, described by a legend and, as the figures, they should be of **excellent quality**. They will be reproduced in black and white in the issue and in colours on the website.

### Bibliography

The bibliography is limited to cited authors who are listed in **alphabetical order**. References are composed as follows: a number, indicated in the text in parentheses; the author's surname, followed by the initial of the first name; the title of the publication, the abbreviation of the title of the issue (*in italics*) according to the Index Medicus; the year; the volume number (**in bold print**); the first and last page (see example below\*). Cite all authors when six or fewer, otherwise cite the first five, followed by *et al.*

**The Société de pathologie exotique sent the final file of the article (by e-mail, in PDF format) to the first author.**

#### \* Example of a bibliographical reference:

- **Articles from periodicals** (periodical title in italics, volume number in bold print)
  1. COLUZZI M, SABATINI A, PETRARCA-V & DI DECO-MA - Chromosomal differentiation and adaptation to human environments in the *Anopheles gambiae* complex. *Trans R Soc Trop Med Hyg*, 1979, **73**, 483-497.
- **Dissertations, books, conferences, reports** (title in italics)
  2. BARBIE Y & SALES P - *Rapport sur les sondages paludométriques effectués dans la région de Zinder du 16 au 20 octobre 1962*. Rapport n° 1796, OCCGE, Bobo-Dioulasso, 1962.
- **Articles from books** (book title in italics)
  3. NELSON GS - Human behaviour and the epidemiology of helminth infections: cultural practices and microepidemiology. In: BARNARD CJ & BEHNKE JM (Eds), *Parasitism and Host Behaviour*. Taylor & Francis, Londres, 1990, pp. 234-263.

**For several references by the same author, consider the first letter or following names, and then years of publication.**
